SOLUTION FOR SECURITY & ALERT

Security Management System

The Security Management System (SecMS) enables customers to have control of their whole security system right at their fingertips. It seamless integration between access control, alarm and video makes it evident that the system was designed to handle all aspects of a security system right from the very start. This contributes to a high level of accuracy when acting on an alarm, reducing the number of false call outs. Check our web site <http://www.dhsgreen.com/> or email us with cs@dhsgreen.com for more detail. Or visit our ELV solution at <http://www.dhs.hk/>.
